

# Asset Management

Furniture is a major investment for any company.

The SBI Asset Management Team will work with you to create an effective, easily manageable strategy for all of your stored assets. With computerized tracking and more than 38,000 square feet of warehouse space, you can feel confident that your assets are organized and secure.

Owning a significant amount of furniture means keeping a portion of it in storage. According to recent estimates, companies that have invested one million dollars in furnishings keep as much as 30% of their inventory in storage. Whether your investment is large or small, storing furniture is only worthwhile if you know what you have, can access it with ease, and reclaim it in good condition.

Sheppard's Business Interiors' Asset Management program makes it easy for you to maximize your furniture investment, while keeping extra assets secure and available. Our staff will help your company create a unique system to enhance the way you manage your inventory. Sheppard's Business Interiors will provide you with simple, easy-to-use tools to track inventory status of each individual product.

- Automated inventory management system
- Specialized, dedicated warehouse staff
- Customizable and easily updated reports
- Convenient access to inventory
- Cleaning, touchup and refurbishment provided by SBI's service department
