We believe that healthcare is a shared experience —that transformative solutions consider the wellbeing of patients, care teams and communities.

Steelcase imagines a healthier future.

A future centered around personalized, predictive care. A future where technology is meaningfully integrated, and systems are flexible and responsive to the needs of all.

Healthier Patients. We're all patients and family members. We study the places that support health and then deliver insights, applications and solutions designed to ensure patients and their loved ones feel safe, comforted and supported.

Healthier Clinicians. We believe the places where clinicians work should help them collaborate effectively, work efficiently and think creatively — and then help them recharge so they can do it again.

Healthier Systems and Communities. We help healthcare organizations and communities achieve more by designing innovative solutions that promote healthy lifestyles and accessible care beyond the physician's office or the four walls of a hospital.

Waiting + Transition

Purposeful and productive waiting spaces provide hosting amenities, access to power and multiple seating options to meet the needs of a variety of patients and family members.

Exam + Consultation + Virtual Care

Innovative exam and consultation spaces effectively allow clinicians to engage with patients (in person and from a distance) by considering changing user needs, increased family involvement and evolving technology.

Administrative

People's expectations for the workplace are rapidly changing. It's time to give them a better work experience.

Workers today need flexible spaces that can change over time — spaces that offer safety, comfort and a sense of belonging.
